

## **SABO at NPE: The Plastics Show 2024**

At the heart of the booth, polymer additives for the U.S. market  
and the drive towards sustainability

*The leading manufacturer of high-quality polymer additives with locations in Italy, Switzerland, Germany and China, will be present at the plastics industry's event with its long-standing team of experts in a brand-new stand.*

Bergamo, Italy. May 3<sup>rd</sup>, 2024 – **SABO is among the exhibitors at NPE: The Plastics Show 2024**, the American event dedicated to the plastics industry that will be held from 6 to 10 May in Orlando, Florida. In a stand with a strong identity, the company will present itself through values and objectives that aim at an **increasing presence in the U.S. market** for polymer additives and new business partnerships.

This goal is part of a broader strategic project: thanks to optimization of the **entire production chain**, to the **products' extensive distribution**, and the acquisition of new and cutting-edge **patented technologies**, SABO responds to the global demand for HALS, serving more than 60 countries with a production reaching about 40,000 tons per year and excellent solutions capable of meeting not only the **stability and durability requirements**, but also the growing regulatory **standards in the matter of sustainability**.

Participating in the USDA BioPreferred® Program, SABO is committed to supporting customers in selecting products that improve their environmental footprint, thanks to the offer of certified bio-based polymer additives.

That led to our motto **SABO - Sustainable Awareness Beyond Objectives**, which becomes an essential part of the booth, characterising the static and digital communication.

SABO's four keywords thus express the image of a growing company, aware of its progress - *the acquisition of new production assets, their integration, the sustainability path* - and of its goals - *the international expansion towards a new global leadership*.

Save the date: May 6-10, 2024, **booth S12203**, Orange County Convention Center, Orlando (Florida), U.S.A.

---

*Company profile.* Founded in 1937, in Italy, SABO S.p.A. is a leading chemical company specialised in the production of polymer additives, cosmetics ingredients and oleo-specialties for numerous industrial applications.

With locations in Italy, Switzerland, Germany and China, SABO has more than 85 years of experience, over 350 employees and five production sites worldwide.

Today, SABO ranks among the world's leading producers of high-quality HALS and is the largest Western company owned entirely by private capital to offer polymer additives worldwide.

*The production sites.* The Levate (Italy) site is the productive heart aimed at the creation of new products and at the continuous improvement of all our core HALS including **SABOSTAB® UV 119**, manufactured in Pontecchio Marconi (Italy).

The Marl (Germany) chemical park guarantees SABO's adoption of an integrated industrial approach, thanks to the interconnected network of services and assets, to the R&D center and the broad availability of top-quality ingredients to be employed in making the latest-generation HALS, in synergy with the Levate site.

The Liaoyang site makes SABO the only Western manufacturer with a production footprint in China and open up new sales opportunities.

The production of **SABOSTAB® UV 94** in Mexico, already active since 2014, continues to guarantee strategic support and procurement for the continents to the west. – [www.sabo.com](http://www.sabo.com)
