

SABO opens a new subsidiary in the U.S.A.

SABO Group, a leading manufacturer of specialty chemicals with operations in Italy, Switzerland, Germany, and China, is expanding its presence overseas to offer products and services directly to customers in the North American plastics industry.

Levate (Italy), September 4th, 2024 – SABO announces the opening of SABO International Americas, a new subsidiary based in Orlando, Florida. This important new step for the company, following the acquisitions of the TAA and TAA Derivatives business and assets last year, represents a historic milestone in SABO's internationalization strategy.

The US subsidiary joins the other three locations in Europe and Asia, strengthening SABO's global presence and reinforcing its role as a leader in the polymer additives market.

*“After more than fifteen years of steady growth,” states **Germano Peverelli**, CEO and Chairman of the Board of SABO S.p.A. “for SABO, a new development phase has arrived and lays the basis for the new global expansion targets and the consolidation of business relationships that focus on fast and effective technical and commercial service”.*

SABO International Americas will be focused on meeting the needs of downstream companies such as masterbatch/compound manufacturers and plastic converters with a complete range of hindered amine light stabilizers (HALS) as well as high-performance antifog and anti-static additives, including USDA-certified BioPreferred[®] grades, a quality mark that attests to SABO's commitment to sustainability.

The long-standing partner of SABO, Songwon Industrial Co., Ltd., will continue to distribute HALS to North American polymer manufacturers, where it has provided unrivalled leadership and service for decades.

To better serve customers in North America, SABO counts on a new team in Florida, led by senior executive Alberto Vischetti, - who serves as Chief Operating Officer of the new subsidiary while maintaining his current role as Senior Vice President Business of the SABO Group - as well as a modern distribution center in Savannah, Georgia, for products imported from Italy, Germany, and Mexico.

The strategic position of SABO's new office and logistics hub will facilitate closer relationships with customers and business partners in the dynamic and ever changing North American market.

Founded in Levate, Italy, in 1937, **SABO** is a leading chemical company specializing in the production of polymer additives, cosmetics ingredients, oleo-specialties and numerous other technological products for industrial applications in different sectors.

With locations in Italy, Switzerland, Germany, China, and now the US, SABO has more than 85 years of experience, 400 employees and 5 production sites around the world, and it is known for its innovation, entrepreneurial spirit and historical, long-standing expertise.

Today, SABO is the largest Western company owned entirely by private capital to offer polymer additives worldwide. – www.sabo.com
